Stefanie Franke - managing director

Dear readers,

welcome to the MEWA GmbH. We are your partner for the production of precision components in the sector of metal working.

We manufacture high-value products in the fields of rail vehicle construction, medical technology and many other important industries. We offer our customers a comprehensive range of services ranging from design through the manufacture up to the quality assurance.

Our work takes in the whole spectrum of the conventional material including steel, stainless steel, aluminium, copper, brass, various alloys as well as plastics.

We are a local family-run company of the German Mittelstand that has extensive experience and a comprehensive fund of know-how. With the help of our qualified and motivated employees, our specialized range of machinery and our outstanding quality we have gained an excellent reputation as a specialist for precision working. Due to close coopera-

tion with our costumers we find the very best solution, even in case of complicated problems. Convince yourself of the quality to be had at the MEWA GmbH. I am looking forward to hearing from you.

*Yours sincerely
Stefanie Franke
(managing director)*

THE MEWA GMBH

We are a family-run company of the German Mittelstand which has been located in the Magerburger Börde since 1951. Emerged from an initial purchase and delivery cooperative we are now specialized in the production of special components. The proportion of the railway and medical technology in our product portfolio has been heavily growing since 2011.

Our strengths include the exact compliance of the required quality, the flexible response to customers requirements, and our reliable on-time delivery- even in case of urgent requests. In order to satisfy continually rising customer demands our company received the re-certification of the quality management and the adaption to the new standard DIN EN ISO 9001:2015 in March 2016. One of our employees became an International Welding Specialist and completed successfully the re-certification of the welding license according to DIN EN 15085-2 CL1 in March 2016. Another employee received the certification „European Adhesive Specialist“.

The quality management is running reliable and can be externally audited. Our work is customer-oriented and flexible, even if your product requests do not correspond our manufacturing profile. Do not hesitate to contact us. We are ready to meet your individual requirements.

CERTIFICATES, DIPLOMAS AND APPROVALS

The market sets us challenges that change all the time. To meet the requirements MEWA GmbH received the re-certification of the quality management and the adaption to the new standard DIN EN ISO 9001:2015 in March 2016.

Have a look at some certifications of our company:

*DIN EN ISO
9001:2015*

*Zertifikat
DIN EN 15085-2 CL1*

*International
Welding Specialist*

*Dipl. European
Adhesive Specialist*

OUR SERVICES

We produce the requested products as prototypes or in series (assembly production) to match the customers needs and desires. That is possible as single production, small lot or batch production. We manufacture according to your ideas, sketches or drawings, with or without our consultation. Of course with exact measures. We work punctually and reliable. We would be very pleased to welcome you in our house to demonstrate our services and production facilities.

Our range of services includes:

- » turning, milling, laser, 3D
- » shearing, (steel – aluminium – stainless steel)
- » folding, (steel – aluminium – stainless steel)
- » processing of inserts manufactured by various producers
- » WIG-welding certificated according to DIN EN 15085-2 CL1
- » brazing and soft soldering
- » pressing
- » CAD/CAM (STP, DXF etc.)
- » bonding (certificated employee)
- » anodising/galvanising/zinc coating
- » painting in according with DB-standards
- » powder coating
- » barrel finishing

If we can not implement an order, we cooperate with experienced and certificated partners.

The MEWA GmbH processes for its customers:

- » steel
- » stainless steel
- » aluminium
- » copper
- » brass
- » various alloys
- » plastics

As an experienced specialist for the production of precision components we primarily manufacture products in the fields of railway and medical technologies but also for other important industries.

According to the customers individual requirements the MEWA GmbH processes the unmanufactured material to precision products. In order to carry out projects we use our modern machine park and the outstanding know-how of our employees.

PRODUCT PROCESSING

Milling - CNC processing

Our portal milling machine is a 4-axis-machine that is optimally equipped with all technical refinements, and due to its size of 3000 x 2000 mm it can be customized to meet specific customer requests. This unit perfectly processes products made of aluminium, plastics and wood.

Folding - CNC processing

We are optimally equipped with the folding machine HFE-3i-220.3 manufactured by AMADA to process aluminium, stainless steel and steel. This ultramodern press brake with seven controlled axis is characterized by a number of innovative technical features such as the enlarged build-in-height, the active angel measurement system and several tool sets for aluminium, stainless steel and steel.

Shearing

The ultramodern guillotine shear AMADA GXII 1230 is a high-efficient and precise machine that enables us to carry out every specific application.

This plate shear uses the experience of previous machines and exceeds their capability by far.

Press-in operation

Our press-in machine PEMSERTER 2000 processes almost all PEM-self-clinching fasteners as well as fastener made by other producers. It is common practice to use fastener from a sheet thickness of 0,5 mm onward.

Welding

We solve complex tasks in the welding area with accuracy and diligence. Regardless of whether you need individual parts or complete assemblies, it is possible to find solutions for even difficult and complicated challenges. Our in-house welding specialist is a International Welding Specialist, who acquired the re-certification of the welding approval according to DIN EN 15085-2 CL1 in March 2016. He is assisted by an external special welding engineer.

Barrel finishing

Our barrel finishing machine, processing small parts, operates with a high level of quality. Without additional and time-consuming handicrafts excellent results can be achieved.

Performance of the barrel finishing machine:

- » deburring
- » polishing
- » filleting of sharp edges
- » degreasing
- » cleaning
- » descaling
- » derusting
- » ball-polishing

guillotine shear AMADA GXII 1230

Modern technology, coupled with know-how and experience enables us to position ourselves in such a way that we can always offer the optimal solution in the interest of our customers, even with demanding tasks.

Do not hesitate to challenge us!

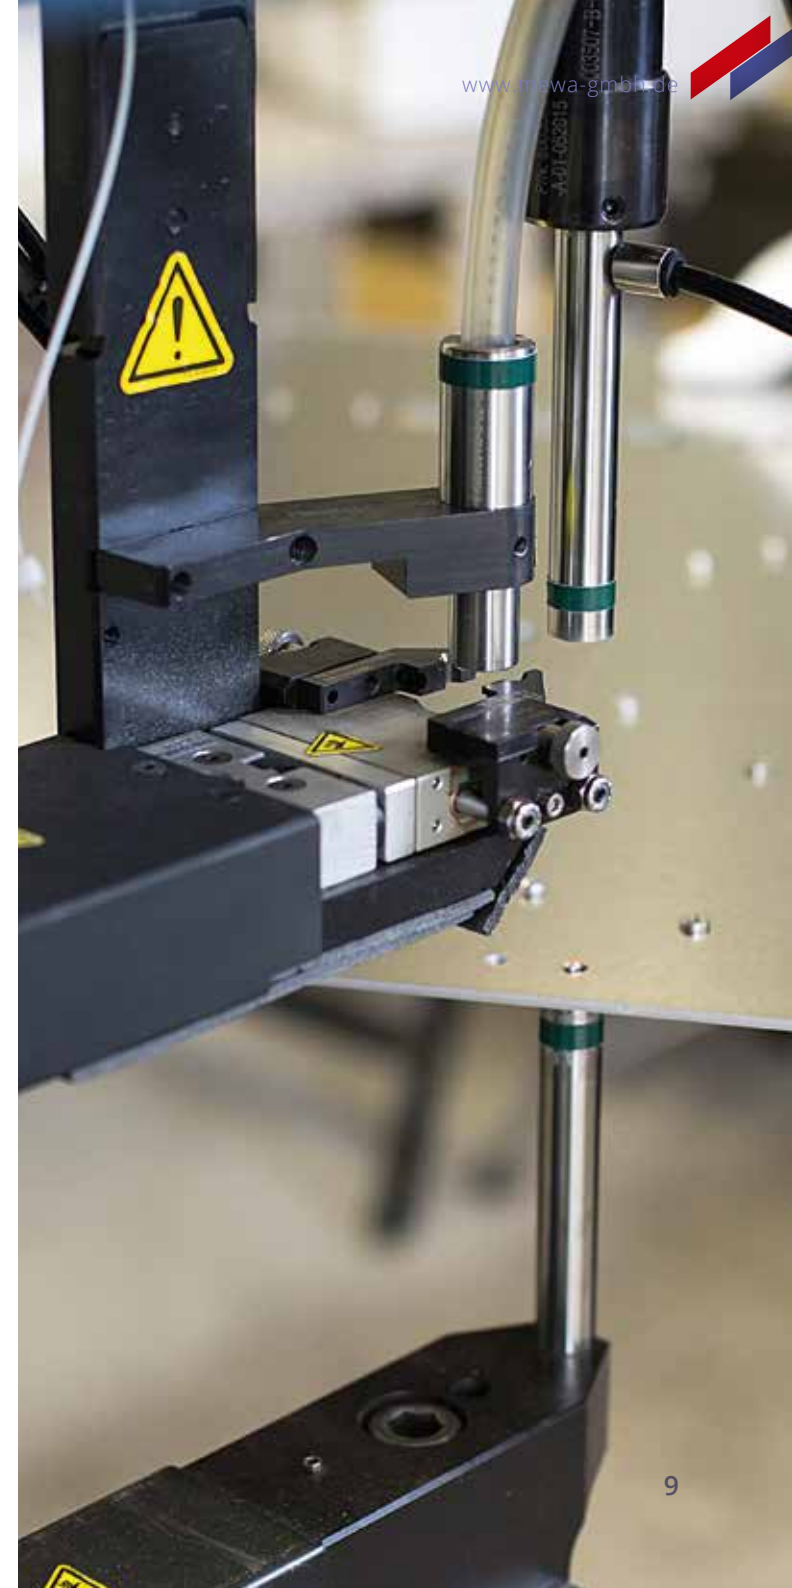

QUALITY MANAGEMENT SYSTEM

The quality management system of the MEWA GmbH has been re-certificated and adopted to the new standard DIN EN ISO 9001:2015 since March 2016. This certification is more than just a duty for us. We regard the confidence, acquired from our customers in the last few decades, as a everyday commitment. Of course, in doing so, we take into account legal and regulatory requirements. Working with the quality management service is our daily business. The focus is on the inspection of the outgoing goods as well as the traceability of the material and production flow. We take care of speedy completion of orders. Our customers know that they can rely on agreed delivery dates.

We benefit from our own warehousing. We have in stock blanks and materials of different quality and dimension, implying that we are able to react promptly to customers requirements. Our machines are all state-of-the-art, assuring the reproducible and cost-effective working of the precision components.

We also dispose of our own fleet and use the logistic advantage to be situated near of important motorways as well as Magdeburg, the state capital of Saxony-Anhalt. We have been working in a focused way with reliable suppliers for many years. We regularly assess the quality of their products and their adherence to delivery dates. All partners benefit from this cooperation.

Our team consists of experienced and qualified employees who have been with us for many years. Their qualification and commitment are vital factors for the successful development of our company.
